

```
# This example demos the WORK-AROUND emulation for elif:
#
```

```

if cond1:
    stmt1
else:
    if cond2:
        stmt2
    else:
        if cond3:
            stmt3
        else:
            stmt4
        #end
    #end
#end

```

```
# This example demos the WORK-AROUND for Prevue Rule 2:
#
```

```
while cond5:
    stmt5
    if cond6:
        stmt6
        if cond7:
            stmt7
            break # deeper level than the if/else pair
        stmt8
    else:
        stmt9
    continue
stmt10
```
